Bond satin finish

Smooth flowing curves for a timeless appeal.

The Metrotile Bond satin-finish tile captures the refined look of a traditional-style roofing tile while incorporating the lightweight advantages of steel. Its distinctive scalloped profile complements any architectural style. Metrotile Bond is available in a wide selection of colours to enhance any exterior colour scheme. Metrotile Bond also comes in a stone-coated textured finish.

Extensive research and development in the design process ensures every Metrotile product is manufactured to the highest quality with exceptional durability and strength. The tile profiles and roofing accessories are engineered to interlock and overlap to resist wind lifting and keep out the harsh elements. At less than 7kg/m², a Metrotile roof is a 'Lightweight Roofing System', so considerable cost savings can be achieved during construction. The perfect replacement for your old existing roof, a Metrotile roof lets you improve the look and value of your home in a matter of days.

Minimum roof pitch: 12.5 degrees.

All of Metrotile's roofing products are fabricated from Zinalume[®] protected steel.

Metrotile's satin finish enjoys added protection thanks to an acrylic top coat that is three times thicker than colour-coated steel. This extremely durable UV-resistant coating enables Metrotile roofing products to withstand the harshest environments around the world. The satin finish system uses only the best quality pigments to ensure excellent colour retention and corrosion resistance.

Metrotile is ISO 9001 accredited. International test reports, appraisals and field results confirm our products are 100% waterproof, earthquake safe, fire resistant and able to withstand hurricane-force winds of up to 190kph (120mph). A Metrotile roof will not only safeguard your investment but will also give you complete peace of mind because it's backed by a Metrotile warranty.

You will not find a more durable, versatile and attractive roofing product on the world market that will surpass Metrotile's quality and affordability.
