Classic textured finish

Make a statement with strong, bold lines.

The Metrotile Classic textured-finish tile features a defined angular profile that makes it one of the most popular products in the Metrotile range. Its sharp, clean lines and sloping edges create added depth and enhance the dimensions of your roofline. The Metrotile Classic is available in a wide selection of colours to suit any design and taste. It also comes in a satin finish.

Extensive research and development in the design process ensures every Metrotile product is manufactured to the highest quality with exceptional durability and strength. The tile profiles and roofing accessories are engineered to interlock and overlap to resist wind lifting and keep out the harsh elements. At less than 7kg/m², a Metrotile roof is a 'Lightweight Roofing System', so considerable cost savings can be achieved during construction. The perfect replacement for your old existing roof, a Metrotile roof lets you improve the look and value of your home in a matter of days.

Minimum roof pitch: 12.5 degrees.

All of Metrotile's roofing products are fabricated from Zinalume[®] protected steel.

Metrotile's textured finish provides added protection by embedding natural stone granules in an acrylic base-coat. A final clear acrylic over-glaze is applied before being oven cured. This extremely durable UV-resistant coating enables Metrotile roofing products to withstand the harshest environments around the world.

Metrotile is ISO 9001 accredited. International test reports, appraisals and field results confirm our products are 100% waterproof, earthquake safe, fire resistant and able to withstand hurricane-force winds of up to 190kph (120mph). A Metrotile roof will not only safeguard your investment but will also give you complete peace of mind because it's backed by a Metrotile warranty.

You will not find a more durable, versatile and attractive roofing product on the world market that will surpass Metrotile's quality and affordability.
